

SKID SYSTEMS

Custom Fabricating & Repair, Inc.

Marshfield, WI

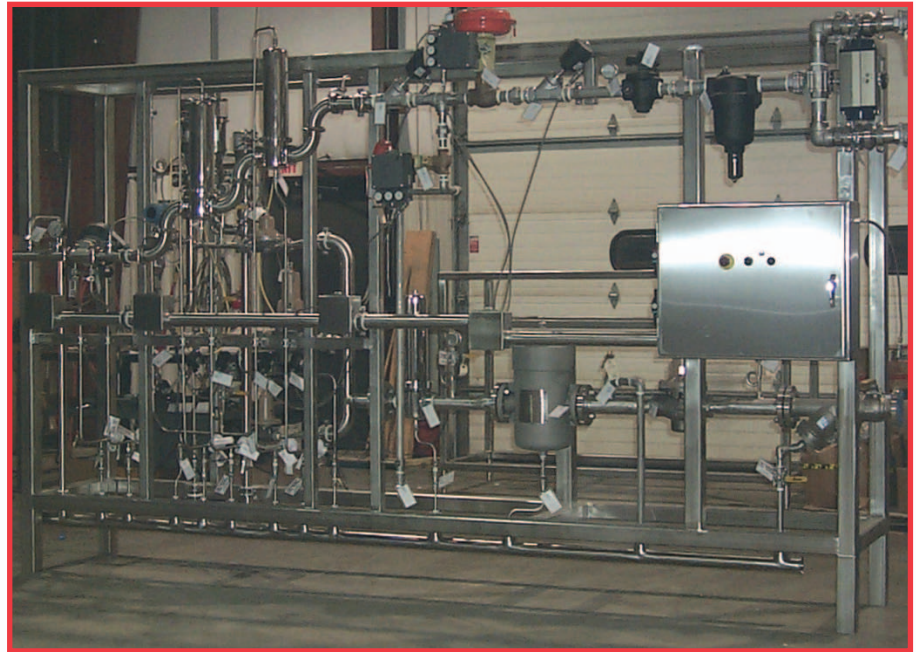

CFR skid mounted systems are designed to meet our customers specific applications and requirements. Modular in design, CFR skid mounted systems can provide complete process control from a singular unit. Systems are pre-piped and controls pre-wired and tested prior to shipment to minimize installation and start-up time. Skids are assembled to allow easy access to mechanical components for maintenance procedures.

Typical applications include the following:

- HTST
- Batch mixing and blending
- Continuous cooking or cooling
- Sugar slurry
- CIP systems
- Filtration systems including reverse osmosis, ultra filtration, micro-filtration, nano-filtration

CFR has the fabricating ability and engineering experience to keep your projects on time and on budget. You can count on CFR for all your process needs.
